WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

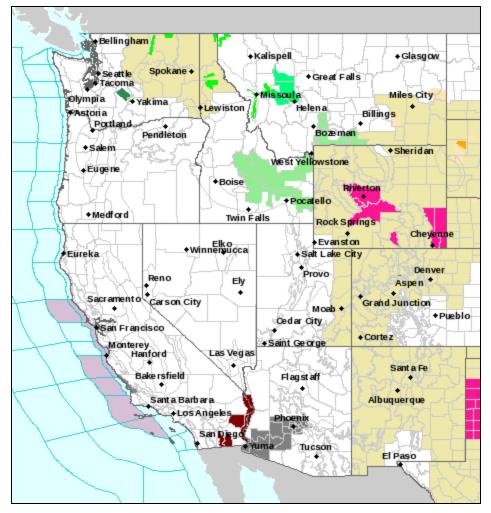

A high pressure ridge over Northern California will move east Tuesday and be replaced by a low pressure trough Wednesday/Thursday. A few light showers are possible in the northern and western mountains late Tuesday and early Wednesday. Temperatures will be 10 degrees above normal through Tuesday, then near normal Wednesday. A northerly downslope surface wind pattern begins Thursday, peaks Friday, and continues at slightly lighter speeds until midday Sunday. Peak gusts of 40-45 mph in wind-prone areas from the western Sierra slopes to the coastal mountains. Temperatures will be 10-15 degrees above normal with minimum relative humidity (RH) of 10-20% Thursday through Sunday.

SOUTHERN CALIFORNIA

A ridge of high pressure over California will cause warm and dry conditions to continue across the region through Tuesday. Maximum temperatures will be around 10 degrees above normal away from the coast, with upper 60s and 70s across the mountains and 80s to low 90s in the valleys. Minimum humidity will be mainly in the single digits and teens away from the coastal areas. A Pacific trough will drop down the West Coast bringing a slow cooling trend and a gradual increase in humidity to the region Wednesday through Saturday. Nighttime north winds of 15 to 25 mph with gusts to 40 mph will surface across much of Santa Barbara County and the Grapevine Area through Thursday. Afternoon westerly winds of 20 to 40 mph with gusts to 60 mph will surface across the desert passes Wednesday through Friday. Another ridge of high pressure will build into California from the Pacific Ocean bringing significant warming and drying Sunday.
